EDUCATION

• National Institute of Technology, Raipur	2025–2029
B.Tech in Computer Science and Engineering	CGPA: 7.58
• Nalanda Eng. Med Hig Sec School	2024
CBSE Class XII	84.6%
• Nalanda Eng Med Hig Sec School	2022
CBSE Class X	94.0%

PERSONAL PROJECTS

- **Deep Convolutional GAN for Image Generation (CIFAR-10)** Winter 2025 – Spring 2026
Developed a DCGAN using PyTorch to generate realistic synthetic images from the CIFAR-10 dataset.
 - Implemented Generator and Discriminator architectures for adversarial image generation.
 - Trained the model on CIFAR-10 and monitored Generator and Discriminator losses during training.
 - Visualized generated image samples and training progress using Matplotlib.
 - Tools & Technologies used: Python, PyTorch, NumPy, Matplotlib, Jupyter Notebook.
- **Conditional DCGAN for Image Generation (CIFAR-10)** Winter 2025 – Spring 2026
Developed a Conditional Deep Convolutional Generative Adversarial Network (cDCGAN) for class-specific image generation.
 - Implemented Generator and Discriminator architectures using PyTorch.
 - Trained the model on labeled CIFAR-10 images to generate class-conditioned outputs.
 - Visualized Generator and Discriminator loss curves during training.
 - Generated and evaluated class-specific synthetic images after training.
 - Tools & Technologies used: Python, PyTorch, NumPy, Matplotlib, Jupyter Notebook.
- **NexCampus — Campus Coordination Platform ([Click Here](#))** \hfill May 2026
Developed and deployed a full-stack campus social & coordination platform featuring role-gated access control, dynamic chat rooms, and automated backend background jobs.
 - Implemented secure authentication with MySQL.
 - Built dynamic post-interaction routing that instantiates real-time chat rooms for item sales, fare splits, and shared event scheduling.
 - Developed an anonymous student grievance portal with server-side identity protection and admin moderation tools.
 - Leveraged AI development workflows to accelerate schema setup, API route architecture, and live cloud deployment on Render.
 - Tools & Technologies used: Node.js, Express.js, MySQL, React.jsHTML/CSS, Render, Git.

TECHNICAL SKILLS & INTERESTS

Languages: C++, C, Python, JS

Developer Tools: VS Code, Git, GitHub, PyCharm

Frameworks & Web: Node.js, Express.js, React.js, PyTorch

Soft Skills: Teamwork, Leadership, Problem Solving

Coursework: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP)

Areas of Interest: Competitive Programming, Web Development, Artificial Intelligence / Machine Learning
